### Services offered:

- **Outpatient services-**  
New and follow-up patients  
Thrice/week (Monday-Wednesday-Friday: 9-12.30 pm)
- **Inpatient services** for chronic skin diseases and dermatological emergencies
- **Dermatological procedures:**
- Skin biopsy: Patients with doubtful diagnosis are confirmed by doing a skin biopsy.

- **Minor procedures:**
- Wart/corn removal by paring
- Molluscum and comedone extraction
- Intralesional steroid injection for keloid, hypertrophic scars and nail dystrophy

- TCA application for: Xanthelesma, verruca plana, stucco and seborrheic keratosis
- Minor surgeries: Mole, Sebaceous cyst and tattoo removal,etc.

### **Special cases management:**

- Sexually transmitted infections (STIs) are managed according to syndromic management approach and patients with STIs are screened for HIV and syphilis. Contact tracing is done if possible.
- Chronic skin disease like psoriasis, vitiligo and acne are managed with regular follow ups and counselling of patients and family.
- Leprosy patients are educated regarding the disease and its complication and advised to be compliant with long term treatment. Family screening is done in lepromatous leprosy patients.

### **Teaching programme:**

Once/ week: Case discussion (Interesting cases)  
Journal club  
CME etc

### **Research/ projects:**

Currently we have started working on 'A Study of incidence of Occupational dermatoses among the employees of ESIC'.
